**Subject:** RE: Are you available to discuss GM-38 Capture Zone Analysis?

Hi Carol and Henry, I'm pretty open during these 2 weeks except Feb 4. N  
that day, so I'll be out.

**Personal Privacy Ex 6/ Medical**

As a bit of follow-up to Carol's inquiry of DEC docs. PDF reports are useful, but Dan Eaton and a few others have been working with us regarding access and exchange of hydrogeologic and sampling data between EPA and NYSDEC since we both use the same basic (EQuIS) EDD system. Katie Mishkin with our Tech Support Section is primary contact on our end. There are several sites of concern in this immediate area. We have groundwater OU for EPA's Hooker-Ruco Superfund site in our database. Arcadis is consultant for Northrop-Grumman OU1 and OU-3 and provide their data to NYSDEC in EDD. I had also accessed and briefly reviewed the Town of Oyster Bay brownfields report on their area at OU-3. Not sure if that is in NYSDEC edd database. I talked with Steve yesterday and he let me know Arcadis also is finishing up the soils OU for Hooker (you call it Bayer) so that is also in NYSDEC database. The other site is Coral Graphics, which was done through NYS VCP. It may have predated NYSDEC requirements for EDD submittal.

Navy 'Bethpage' is the primary concern as to EDD data for the area. Navy has their own data-management system, but after countless attempts, I cannot get access due to our own firewalls, and no-one at State was available to try to access or translate into State EDD at that time. It might be best to have NYS put a bit of pressure on Navy to have them finally agree to send their data in EDD format to State.

I'll note that I've had no problems with a NJ Naval facility routinely having their contractors submit their data to EPA in our EQuIS format. Our RPM has found that very useful. NJ Navy has just awarded a major contract with a new contractor, and they readily agreed to continue that approach for the next 10 year period.

I know Paul Misut from USGS and have worked with him and their office a long time. Steve S. had sent the Nov powerpoint presentation, and I'd be interested in learning your take on it. USGS had also made a 3-D GIS based map of Nassau County & VOC groundwater contamination a few years ago. I don't know if Henry participated in the webinar held on that.

Food for thought.  
Regards  
Robert M. Alvey, P.G.

**Subject:** Are you available to discuss GM-38 Capture Zone Analysis?

Good Morning Steve and Henry - Rob Alvey (EPA geologist) and I would be interested in setting up a time to talk to you about the USGS report on GM-38, preferably also with Paul Misut of USGS. Rob also is very interested in introducing himself to Henry, so I think this call could be a perfect opportunity. I would estimate that the call should take around 45 min to an hour. What is your availability for the weeks of Jan 26 and Feb 1?

Also, do you know if documents stored on the DECEOCs system are available to EPA employees, and how we can access them?

Thanks,  
-Carol-

Carol,

Copying us both is fine. I always tried to keep Henry informed of all the goings on in the past. I have been putting it all into the DECEOCs system as well.

Thanks,

Steve

Steven M. Scharf, P.E.
